

RECOVER SERVICES

Contact wheels can be recovered for significant cost savings. We can duplicate the covering material of worn wheels and rollers, as well as any grooving configuration. CRC recovered wheels are precision ground and balanced assuring performance to match a new wheel or roller.

CONTACT RUBBER CORPORATION

RECOVER ALMOST ANY CONTACT WHEEL OR ROLLER

We have material compounds available for heat resistance, abrasion resistance, and high-release properties — a full range of rubber hardnesses from 20 durometer through 90 durometer is offered.

Recover like new

Roller recover service includes core inspection and repairs if necessary; precision ground rubber diameter concentric with bearing journals; helical grooving and dynamic balancing. Recover service for wide belt grinding, sanding, and finishing machines is our specialty. CRC has state-of-the-art grinding, serrating, and balancing equipment.

Our office and warehouse in Bristol, Wisconsin has recovered over 10,000 contact wheels and rollers since 2010.

Contact our Customer Service experts who will be happy to assist you and find the best solution for your application!
